**Learning and Teaching Methods**

· The study of the first theme of the syllabus aims to give concrete form and allow the first and second of the syllabus objectives to be legally and normatively framed.

· The study of the second theme of the program content aims to implement and achieve the first three program objectives. The treatment of the third theme of the programmatic content aims to materialize and provide the achievement of the fourth of the programmatic contents

**Assessment Methods**

1/ The continuous evaluation method, during the normal season, will be the result of the sum of the values obtained in the following evaluation elements, each of which will be assigned a maximum value corresponding to the following table:

ELEMENT VALUES DESCRIPTION

ELEMENTS

VALUES

DESCRIPTION

2,0

Full attendance in classes

2

8,0

Group written work (preferably 2 students per group)

3

4,0

Individual defense of group work

4

4,0

Individual written test

5

2,0

Individual preparation of a scheme for third-party intervention

2/ The final assessment is carried out through a single assessment element, consisting of a written exam, during the appeal period.

The student will obtain approval in the curricular unit in any of its assessment methodologies if the classification resulting from the respective assessment elements is equal to or greater than 10 (ten) values.
