Learning and Teaching Methods

The course syllabus has been defined based on the objectives to be attained for this curricular unit, as well as the skills to be acquired by students. With the first chapter it is intended to understand the key concepts associated with strategic planning in local authorities. With the second aim is to understand the relationship with instruments of territorial management. With the third, fourth and five the target is to know the several phases of the strategic planning process, public participation in this process and review strategic plans of municipalities. In the last chapter the aim is to know the major innovations in terms of strategic planning in local authorities.

Assessment Methods

The evaluation will be carried out according to the following requirements:

Evaluation of the Final Work = 100%
