Learning and Teaching Methods

The programmatic contents have been defined based on the objectives intended for this curricular unit, as well as skills to be acquired by students. Chapters 1, 3 and 4 are made known to students the current requirements of Internal Auditing and their nature, objectives and constraints. In Chapter 2, the students learn to evaluate and implement an internal control system. In Chapters 5 and 6, the students learn to plan and conduct internal auditing and select and use the respective methods and techniques.

Assessment Methods

In continuous assessment, the assessment system involves the realization of one group assignment (70%) and a final test (30%). To obtain approval for the curricular unit, the student must have a minimum grade of 10 values.

In the remaining assessment periods, including grade improvement, the assessment system involves the realization of a test (100%).
