Learning and Teaching Methods

The course contents have been defined based on the objectives to be achieved within this curricular unit, as well as skills to be acquired by students. Is exemplified, below, the consistency of these parameters. Given the current developments in terms of accounting harmonization and standardization, and better interpretation and understanding of current national and international standards, in Chapter 1, we study the latest developments in accounting standards harmonization. In order to promote critical analysis of the accounting framework, in Chapters 2 to 6

deepen some of the core issues of financial accounting. At the end of chapters, It is intended provide students with the skills needed for analysis and professional judgment of accounting standards.

Assessment Methods

Students will be submitted to a continuous evaluation model composed of the following components: An evaluation test, with a weighting of 70% each for the final grade, on december 5, 2022. A group work and its presentation, with a weighting of 30% each for the final grade, to be delivered by December 2, 2022 and presentation on December 3, 2023. For approval to the curricular unit in continuous evaluation it is a condition that the final average of all evaluation elements is greater than or equal to 9.5 values (on a scale from 0 to 20 values). The evaluation by examination, in a face-to-face regime, deals with the entire subject taught in the curricular unit, having a weighting of 100% for the final grade. Note: The use of graphic machines or mobile phones, whatever their purpose, is not permitted during the evaluation tests.
