Learning and Teaching Methods

The syllabus contents were defined based on the objectives that are intended to be achieved for the Curricular Unit Património Autárquico, as well as the knowledge and skills to be acquired by the master's students, thus exemplifying

the coherence between these two parameters. The first module, of a legal nature, aims to provide the conceptual and normative tools necessary to understand the

legal regime of the heritage of public legal persons in Portugal and to understand the purposes, forms and means of using and administering such assets, within the public domain. and the private domain of public legal persons, with particular impact on local authorities. The main problems of the legal regime of public real estate heritage are also introduced, namely the absence of criteria of dominance, encouraging the master's students to develop a critical analysis on this theme. The second module, of an accounting nature, aims to show how the recognition, measurement, inventory and control of

tangible fixed assets is carried out, within the scope of the accounting standards for Public Administrations (SNC-

AP).

In this module, special reference is made to class 4 - Investments (SNC-AP), tangible fixed assets and public domain assets.

Assessment Methods

The evaluation of the Course Património Autárquico will be carried out according to the following criteria: a) Attendance at classes and seminars: 10% b) Written work: 60% c) Oral defense of the evaluation work: 30% Note 1: The student will have to choose between a Module I (Law) theme or a Module II (Accounting) theme.

Note 2: Papers must have a maximum size of 20 pages.
